Formwork Technology – Design with the other 90% CITIES

“Discovery consists of seeing what everybody has seen and thinking what nobody has thought” - Albert Szent-Gyorgyi

- Deputy President Kgalema Motlanthe
  o "The government had failed millions of people who were living "like pigs" in informal settlements, and efforts to explain to them why this was so after more than a decade and a half of democracy would be meaningless" - IOL
- President Jacob Zuma
  o "Youth unemployment a ticking time-bomb“ - NEDLAC
- Minister Tokyo Sexwale
  o "Thabane Zulu told the human settlements portfolio committee it would cost about R58 billion for the human settlements department to fix poorly built houses“ - TimesLive

As a solution to the above crucial issues, we are honoured to have been selected by the Smithsonian's Cooper-Hewitt, National Design Museum - Rockefeller Foundation Design with the Other 90% CITIES to showcase the South African designed and patented formwork construction technology as an innovative solution to address the unprecedented growth of informal settlements globally combined with skills transfer and job creation.

Exhibition runs till January 9, 2012

New York

Re-usable plastic formwork-mould to cast a home in a day
Formwork Technology – Design with the other 90% CITIES

moladi Structures - Stronger than brick and mortar

Transferring skills
Creating employment
Developing entrepreneurs
Housing the homeless
Applying new innovative financial structures
Implementing sustainable human developments

Read more >

The moladi formwork technology is introduced to many countries that have realized the importance of creating employment providing shelter
